With You For The Long Haul... since 1914

www.fleetbrake.com

DID YOU KNOW?

Fleet Brake and its group of companies has been serving Canada for **105** years?

The history of our business goes back to 1914 when Henry McCoy moved to Edmonton from Montreal and opened a blacksmith shop in downtown Edmonton. In 1923, the advent of the Model T coupled with Alberta's rough roads provided Henry with the inspiration and opportunity to open a spring manufacture and repair business. The original family carried on the business of providing heavy-duty truck services for the next 88 years. In 1978, Fleet Brake was created by the Bzeta family and over the next several decades, parts sales, truck service

repair and maintenance operations were expanded both geographically and in product offerings. In 2011, the Real McCoy Service Centres was acquired by Fleet Brake. With a **105** year old legacy of serving the commercial vehicle business, Fleet Brake is positioned well for the next 100 years

PENTICTON – KAMLOOPS – LETHBRIDGE – CALGARY - RED DEER – EDMONTON - GRAND PRAIRIE – WINNIPEG – MISSISSAUGA – MONTREAL - DARTMOUTH

With You For The Long Haul...TM since 1914

INSTRUCTIONS FOR MEASURING SPRINGS

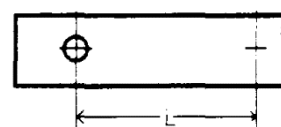

The following sketch shows the correct method of measuring the straight length of a spring. This is the length shown in the list of dimensions on the inside pages. The length is measured from center line of eye following curve of the main leaf as shown by the dotted lines.

THE DISTINCTIVE NUMBERS USED IN THIS MANUAL TO IDENTIFY SPRINGS WERE DEVELOPED AND ASSIGNED BY THE SPRING RESEARCH INSTITUTE FOR THE EXCLUSIVE USE OF ITS MEMBERS. ONLY SUCH MEMBERS ARE AUTHORIZED TO USE SUCH NUMBERS. NEITHER THE INSTITUTE NOR ANY MEMBER CAN BE RESPONSIBLE FOR UNAUTHORIZED USE OF THESE IDENTIFYING NUMBERS.

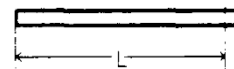

SPRINGS WITH EYE ON MAIN LEAF ARE MEASURED TO CENTER OF EYE (FLAT)

SPRINGS WITH HOLE ON MAIN LEAF ARE MEASURED TO CENTER OF HOLE (FLAT)

SPRINGS WITH HOOK ON MAIN LEAF ARE MEASURED TO OUTSIDE OF HOOK (FLAT)

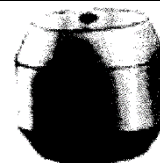

SPRINGS WITH PLAIN ENDS ARE MEASURED TO END (FLAT)

INSPECTION AND MAINTENANCE

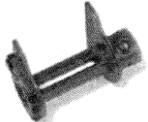

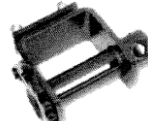

Whether you use Premier Jacks, Couplings, Drawbar Eyes, Hinge Assemblies or any other Premier product, regular inspection and maintenance are essential for proper function, keeping repair costs to a minimum and above all, safe and efficient operation.

As part of our effort to assist you, Premier has developed Serviceability Gages (picture at right) that help judge the useful life of each of our major product lines that help guide you through inspection, routine maintenance and part replacement. Another resource is our World Wide Web Site at www.premier-mfg.com. Here you will find Service Guides, Installation Guides, Distributor Locations and links to trucking resources.
